## The Game of Poker

### History of Poker

Poker may have originated from a 16th century Persian card game known as As Nas. It was probably then taught to French settlers in New Orleans by Persian sailors. Europeans used to call the game 'poque' or 'pochen.' Poque is a French term which in turn evolved from the German term pochen which means to knock. From this it may emerge that the origins of poker could lie in Europe and Persia, however it truly blossomed in the United States. It further increased in popularity when American gambling became popular in western frontier towns to and riverboats.

The legend says that the earliest version of Texas Hold'em was played by Robstown, Texas in the early 1900s. The game is said to have first come to Dallas, Texas, in 1925. The game is then said to have been introduced to Las Vegas by a few Texan gamblers and card players, including Crandell Addington, Doyle Brunson and Amarillo Slim. In 1972, 8 players took part in the World Series of Poker tournament; and thirty years later, the figure shot up to 800. ## Poker Superstitions

Wearing something red will bring you good luck.

Sitting against the grain of the poker table layout is bad luck.

A player may cast an influence on his luck if he discards the four of clubs or spits on his cards or refuses to give permission to his opponents for placing their feet on his chair.

You can dispel bad luck if you wear dirty clothes while playing.
